**RE: OG Construction**

Dear Sir:

This is my **Letter of Recommendation** attesting to the professionalism and quality-of-construction for OG Construction in the areas of Water Line, Sanitary Sewer (line work and lift station), Paving and Storm Drainage construction.

OG Construction has been the successful bidder on several of my projects and has met all the construction requirements of the applicable jurisdiction. His projects have been completed on-time and consistently provide One-Year of Warranty on all their construction. All of my clients have found them to be very meticulous on all of their work.

OG Construction is easy to work with and communication between their field representatives and our office has been excellent and very responsive.

I would highly recommend to the North Alamo WSC to permit OG Construction to provide construction services within your Service Areas. Currently, they are working on and have completed construction projects through out the Valley. If you have any questions, please do not hesitate to give me a call at your convenience. Thank-you.

Sincerely,

**SALINAS ENGINEERING & ASSOCIATES**
